In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication & Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus the diffusion process consists of a few individuals who first adopt an innovation, then spread the word among their circle of acquaintances—a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet, and how it has transformed the way human beings communicate and adopt new ideas. A guide to the Internet's Domain Name System and the Berkeley Internet Name Domain software covers domain and server setup, troubleshooting and configuration, load sharing, subdivision, and server security. A veritable textbook of emergency preparation products and procedures. Used by first-responder schools across the country. The classic *Designing with Type* has been completely redesigned, with an updated format and full color throughout. New information and new images make this perennial best-seller an even more valuable tool for anyone interested in learning about typography. The fifth edition has been integrated with a convenient website, www.designingwithtype.com, where students and teachers can examine hundreds of design solutions and explore a world of typographic information. First published more than thirty-five years ago, *Designing with Type* has sold more than 250,000 copies—and this fully updated edition, with its new online resource, will educate and inspire a new generation of designers. The most student-friendly, contextual, and inclusive survey is now personalized, digital, and mobile for today's students. *Art History* 5th edition continues to balance formal analysis with contextual art history in order to engage a diverse student audience. Authors Marilyn Stokstad and Michael Cothren- both scholars as well as teachers- share a common vision that survey courses should be filled with as much enjoyment as learning, and that they should foster an enthusiastic, as well as an

educated, public for the visual arts. This revision is the strongest and most comprehensive learning program for measuring student progress and improving student success in attaining the outcomes and goals of the art history survey course. Not only does the text address four overarching goals of the survey course, the new MyArtsLab further develops and reinforces these outcomes and skills with market-leading learning tools such as personalized study plans for each student and multimedia assets geared towards addressing different learning styles and abilities, such as chapter audio, student videos, Closer Looks, architectural panoramas and much more.
